

~~SECRET~~*Office Memorandum* • UNITED STATES GOVERNMENT

TO : Chief, Materials Division

DATE: 21 November 1958

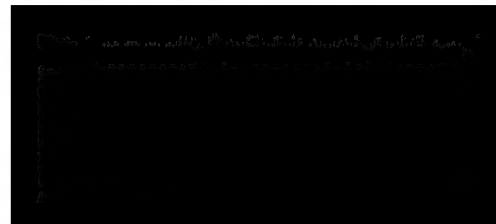

FROM : Chief, Food and Agriculture Branch, D/M

SUBJECT: Soviet Industrial Fermentation Research, Development, and Technology

1. As indicated in the preface, the subject report is designed to evaluate Soviet industrial fermentation research, development, and technology particularly in regard to fermentatively produced substances of importance to industry, medicine and agriculture and the food and feed industries.

2. The section on food and feed production by fermentation (pp. 21-28) deals with the scientific considerations of yeast, fungi, and algae rather than their practical application to increasing the production of food and feed.

3. While not without interest from the academic point of view, the section indicated in paragraph 2 is without practical economic significance.
